## WELCOME TO COBIS

Copenhagen Bio Science Park is the ideal place to be for biotech companies, offering a professional environment to help bring your business to the next level.

Our location is perfect. We are centrally placed between Denmark's leading hospitals and major universities - in the heart of Medicon Valley, the world's leading biotech region, and just minutes from the center of Copenhagen.

The facility itself is exceptional: A 12,000 m<sup>2</sup> building of modern architecture complete with lab facilities, offices and service areas. COBIS is home to a powerful mix of national and international organizations, housing start-ups, mid-size companies and tech trans professionals within life science.

**WE CAN'T WAIT TO MEET YOU!**

**Morten Mølgaard Jensen,  
CEO, COBIS A/S**

# Meet our companies

Some of the most promising new biotech and life science startups in Denmark are located at COBIS. Highly skilled, professional in development, and fun to be around – they are the heart and blood of the science park and probably the main reasons you should consider choosing COBIS as your next location. More than 70 companies have already chosen COBIS - why not join them!

So, you already have the

# GREAT IDEA?

**(... now comes the tricky part)**

Protecting your idea can be a daunting task. Our experts help secure your patents and trademarks, and assist you all the way from the drawing board, until your product hits the shelves.

HØIBERG is a full service patent and trademark company providing services within the areas of Intellectual Property Rights (IPR), including Patents, Trademarks and Designs, Innovation Management, Technology Transfer and Business Development.

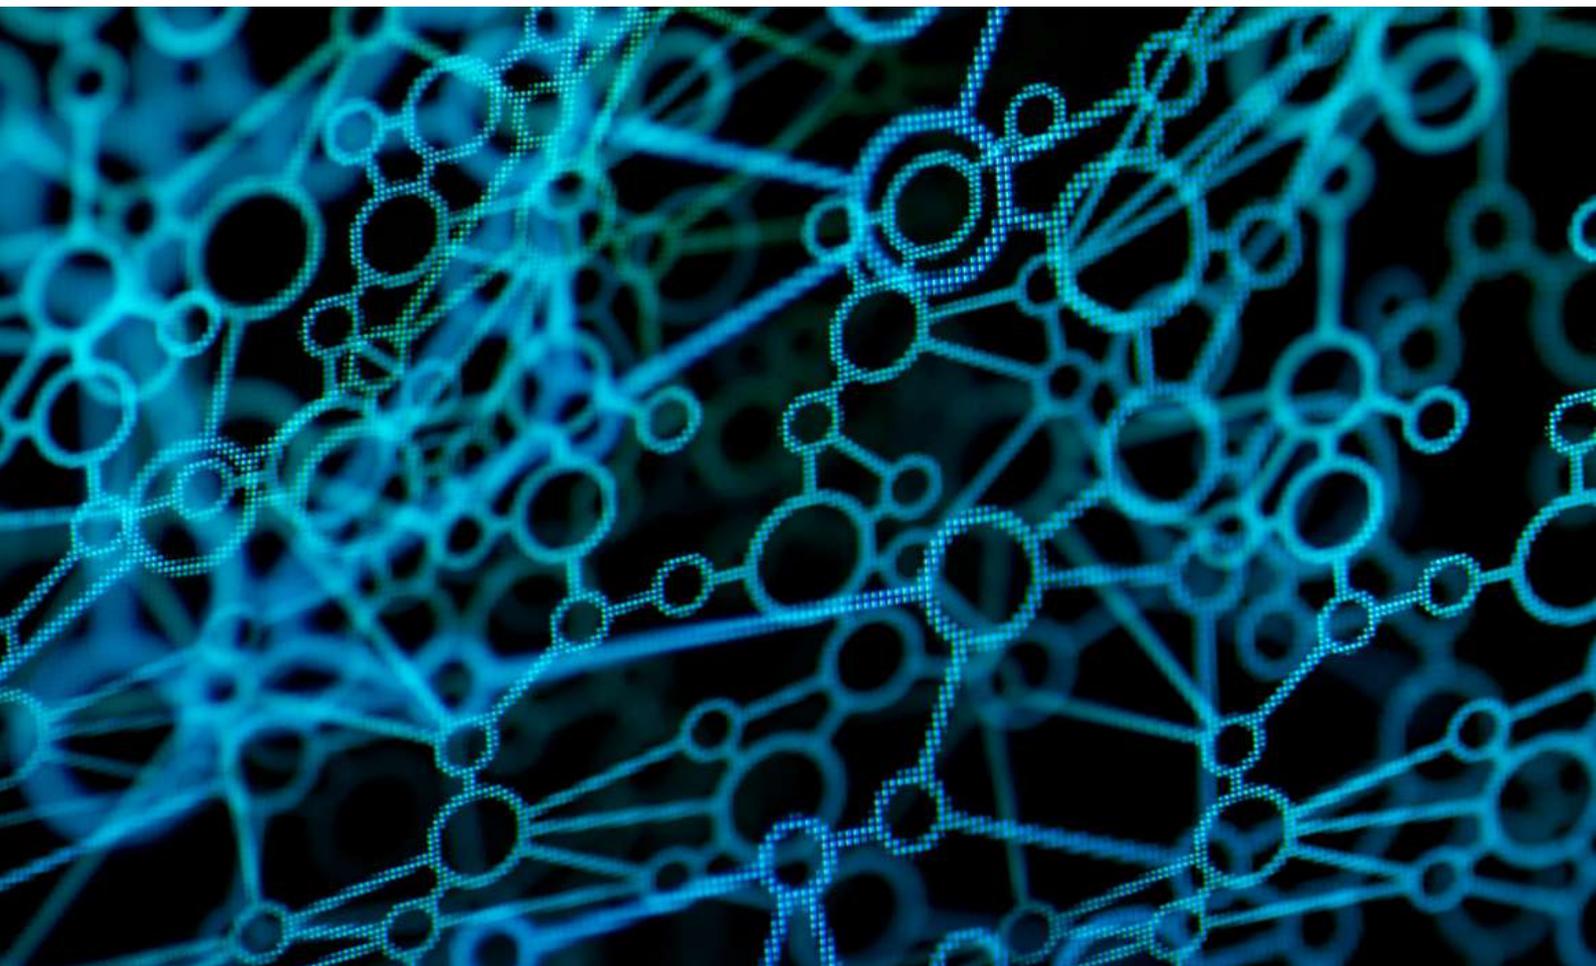

We counsel public research institutions as well as private companies, and our clients range from small independent start-ups with a single patent to large multinational companies with extensive IPR portfolios.

We provide expert IPR knowledge in the fields ranging from biotech, medtech, nanotech, chemistry and cleantech to software, electronics and mechanics.

We assist you at every stage of development – from idea to realisation.

“

*I have been part of the COBIS community for four years and have benefitted tremendously from the active network in and around COBIS. The science park is a perfect meeting place for life science entrepreneurs, both young and more experienced, to do business.*

Hans Schambye, CEO, Galecto Biotech

# Network is COBIS' most important asset

Want to boost your company growth? We believe that participating in a professional network helps a company grow faster than its competitors. The network we have built in and around COBIS gives your company a considerable advantage, creating an environment which by definition promotes research and interaction. At your fingertips, in-house, will be the accumulated experience of a host of companies in your field.

COBIS will provide you with direct access to the individual networks that suit you and your business.

And, there are, of course, all the unofficial networks that arise organically as companies meet and share information and ideas. At COBIS, we also offer you access to the relevant seminars and social activities that help support the network across the science park.

COBIS has close ties to universities both in Denmark and throughout the rest of the world, as well as other key research facilities, to supply your company with the most groundbreaking knowledge, investigation and analysis.

“

*We joined COBIS in February 2015 when establishing our company, Biomatics Technology, with a base also in Copenhagen. Being close to many young biotech companies in COBIS gave us a brilliant platform for sharing knowledge and gaining a head start in our business development.*

Christian W. Lysholm, Biomatics Technology

# Business development for innovative life science projects

Have you developed a new product or service and need help getting it quickly and efficiently to the market? Then the Accelerace program may be just right for you.

Accelerace is Scandinavia's leading business accelerator supporting the most promising national and international start-ups and growth companies. Over a 5-month period we help startups achieve success through training, funding and business development.

## WHAT YOU GET

- +180 hours one-on-one sessions with our experienced team
- €16.500 seed financing in cash when accepted into the program (as a loan, but no equity taken)
- Founders pack with resources and tools worth of +€50.000 from companies such as Amazon, Deloitte, Microsoft and many others
- Monthly training sessions and workshops where international mentors take on the latest trends and provide useful tools
- Network to the leading venture capital firms and angel investors in Scandinavia

## WHAT'S THE DEAL?

Unlike other accelerators, we demand no equity stakes when we decide to work with you. Your company is yours and yours alone. However, we do charge a participation fee for our services. Contact us to learn more.

## COPENHAGEN ENTREPRENEUR LAB FOR LIFE SCIENCES

At COBIS, we also offer incubator space for new entrepreneurs, research projects, and innovative biotech firms.

In Copenhagen Entrepreneur Lab for Life Sciences (or CELLS in short) we offer a creative space where you can advance your business ideas, create professional and personal networks, and hone your entrepreneurial skills and knowledge.

It is the first co-founder Hub in Denmark - with the ambition to translate the most promising ideas and projects into start-up companies that hopefully will continue to grow into larger ventures.

## PICUS

- Let at programmere
- Vejer kun ca. 100 g
- Anvender samme opladesystem som eLINE pipetterne.

## VIAFLO ASSIST

Vinder af Red Dot award 2014

Unikt instrument til aflastning af mindre pipetteringsopgaver.

## SARTORIUS

Laboratorie vandanlæg og vægte.

## VIAFLO

- Innovative
- Lette at betjene
- Unikke features
- Multikanal pipetter med justerbar spidsafstand.

## VIAFLO 96 & 384

Instrumenter der kan anvendes til dispensering og pipettering i 96 & 384 brøndsplader. Viafil kan desuden anvendes som pladevasker.

## VIAFILL

## Field Service

Service & Kalibrering af pipetter udført hos Jer:

- Alle fabrikater & typer
- Voluminer (>10ul - 25ml)

## Service afdeling

DANAK akkrediterede kalibreringer af pipetter ifølge ISO 17025, samt efter retningslinjerne i ISO 8655.

- 10.3 AKK. - 10 målinger i 3 voluminer
- 6.3 AKK. - 6 målinger i 3 voluminer

## Kemp & Lauritzen

# Flexibility is the key

At COBIS, you will have access to office facilities and modern laboratories at the highest international standards, with the flexibility to scale up or down according to your needs. Part of the COBIS philosophy is giving you the freedom to easily expand or reduce your area in the science park, providing offices that always meet your needs.

COBIS also offer laboratory facilities suited to research in gene technology and radioactivity. The laboratories are designed to fit your equipment, and if necessary, we can help you acquire fume hoods, benches, incubators etc. - anything you need to conduct first-class research.

Flexibility also means that you don't pay for services you don't need. As your firm grows, other services might be relevant, and we can provide you with just what you need, just when you need it.

*Orphazyme moved to COBIS in April 2010 and has had significant growth ever since. With our demands for flexibility, COBIS has been a valuable partner as our need for more space and services have developed.*

Anders Hinsby,  
CEO, Orphazyme

*During the last few years, Biocare Copenhagen has had great success and are today one of the top-companies within probiotics and bacterial compounds. COBIS has assisted us in supporting our growth by offering flexible terms that has allowed us to expand our facilities. It is a great place for doing business and the facilities are perfect to our current needs.*

Jesper Gantzel, Biocare Copenhagen A/S

## In the heart of Medicon Valley

COBIS is located in the heart Medicon Valley - of one of the world's leading biotech clusters.

Medicon Valley is one of Europe's most prominent life science clusters. The entire pharmaceutical value chain in Medicon Valley is flourishing - from target identification through preclinical and clinical development to manufacturing itself. The R&D process is helmed by companies within the bio or medical technology fields, and strongly supported by many specialized service providers - CROs, consultants and patent attorneys. More

than 300 life science companies are currently located in Medicon Valley.

Medicon Valley companies excel in many of the most commercially attractive therapeutic fields, such as diabetes, neuroscience, inflammation, protein and cancer research. Add to this an increasing amount of regional and foreign investments in Medicon Valley, and the result is a prosperous cluster with many very successful biotech companies. There are a multitude of reasons why Medicon Valley has the world's attention.

# Your gateway to an international presence

As COBIS becomes an increasingly renowned global player, we offer you access not just to Danish companies, but companies from all around the world. This way, we can help you penetrate global markets more efficiently, and establish a strong international presence.

With us at your back, you will be fully prepared to explore global markets, set up relations with foreign businesses, secure international venture capital, all the while focusing entirely on growth.

Through programs such as Accelerace Life and Universal Partnerships we are able to open doors on both European and overseas markets, and even potentially co-fund your business idea.

“

*As a new startup company, we need to be very cautious about our costs. COBIS understands that and has offered 3Dintegrated a cost effective solution with just a few desks in a great networking environment. It is the perfect way to start out.*

Henriette Kirkegaard, 3Dintegrated

## Harvesting innovation on flexible, cost-efficient terms

At COBIS, we know all about the cost of running a research business, which is why we offer a series of services for biotech companies wanting to grow - services that would otherwise be very expensive.

### WE OFFER:

- Laboratory wash and autoclave
- Surveillance of sensitive instruments or rooms
- Handling of chemical and biological waste
- Delivery of ice, dry ice, compressed air, etc.
- A concierge to help you access facilities, animal stables and equipment from other institutions

## You focus on development - we'll worry about the rest

COBIS' vision is to create the optimum location in Northern Europe for the commercialization of life science research, and the development of sustainable biotech companies. As a resident of COBIS, you will have access to a modern, fully equipped science park.

### **OUR SERVICE PACKAGE INCLUDES:**

- A professionally staffed reception to welcome your guests and answer your calls
- Mail distribution service
- Access to conference facilities with complete AV systems

- Refreshment and catering facilities
- Printing, copying, scanning and faxing services
- Fast and secure high-speed internet
- Secured access control
- Cleaning and maintenance services
- Placement and promotion of your company on our website, [www.cobis.dk](http://www.cobis.dk)

Our facilities include offices and laboratories ranging from 15 square meters and upwards. Call us to learn more about the possibilities for your company.

## KROMANN REUMERT – YOUR STRATEGIC PARTNER ON YOUR WAY TO SUCCESS

KROMANN  
REUMERT

The overall challenge for growth companies in the biotech sector is the extensive regulation of all aspects of the business activities – ranging from research through to distribution, marketing and sales – combined with the difficulty of navigating in a market characterised by public law. Our practice group is a strategic mix of lawyers with different specialised practice areas and extensive experience in the biotech sector who, as a team, can help you on your way to success.

## Homage to our founders

COBIS is the grand result of the political vision of the Ministry of Science, Innovation and Higher Education, and the Capital Region of Denmark to strengthen the biotechnological competences of the region.

Behind COBIS are two of the most experienced science parks in Denmark: Symbion Science Park and Scion DTU a/s. These science parks have decades of experience in operating high-tech facilities, commercializing research, venture financing new start-ups, and co-operating with universities, research institutions, trade, industry, and the entire palette of business advisers.

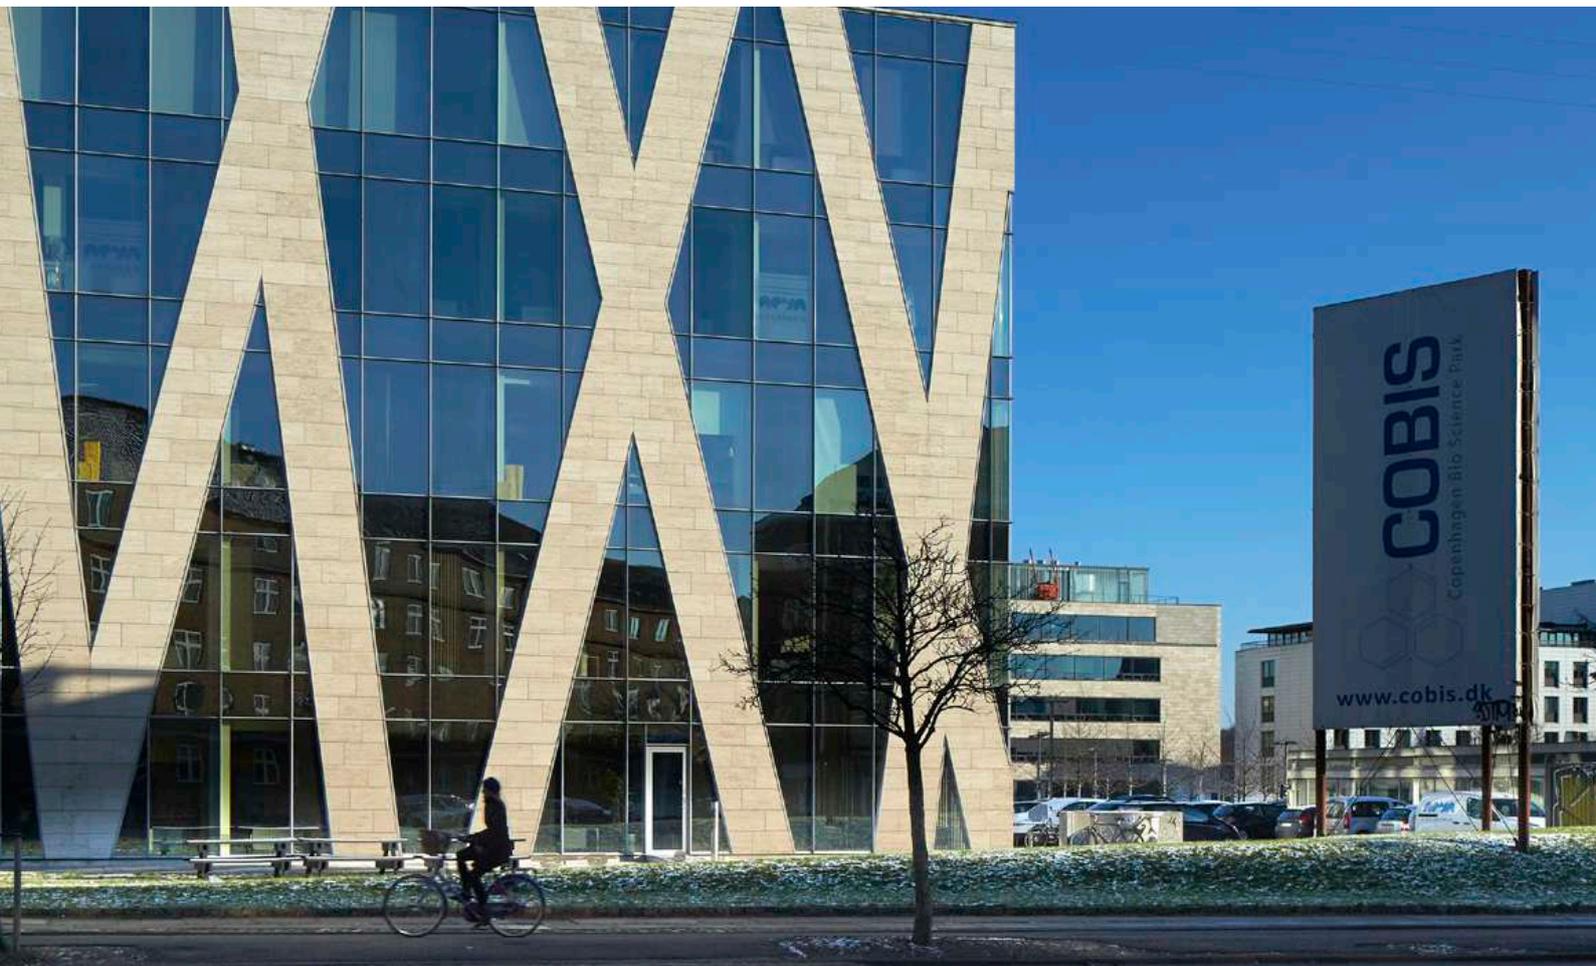

### **SYMBION**

Symbion Science Park has 30 years of experience in helping young, ambitious companies working with innovative, high technology and research-

based ideas within IT, telecom, biotech, pharmacology, or medicine. Every year, Symbion helps approximately 220 young companies with facilities, business development and/or financing.

### **SCION DTU**

Scion DTU, owned by Denmark's Technical University, helps innovative people and businesses realise their high-tech ideas - and commercialise them. As an international Science Park rooted in the university environment, they create the ideal framework for growth by providing access to buildings, facilities, services, consultancy and professional networks. With more than 180,000 sq metres Scion DTU collaborates with more than 250 science-based companies and their 3.500 employees. More than 50 years old, Science Park Scion DTU is one of the world's oldest clusters for science-based enterprises.
